

CORKBEE

CORKBEE is a polish brand that combines passion for good design and simple forms.

We focus on high quality and sincerity of material. Our goal is to create unique things that will complete any interior and context.

Idea of natural design, based on simplicity and using goods of nature, guided us to create corkWALL collection.

WHAT IS A CORKWALL?

CorkWALL is a collection of an environment friendly 3D wall panels made of recycled cork. It is a combination of unique design and care for the environment. A combination of high quality with the sincerity of the material. Naturally.

CorkWALL is a unique wall decoration that complete any interior. It will take care of its acoustics and microclimate. It will be created without harm to the environment.

Thanks to their shape, corkwall panels can be arranged in one direction, create symmetrical patterns or create a unique composition. There are countless combinations.

THE INSPIRATION

Our inspiration is nature, which is characterized by uniqueness, durability and timelessness. This is why, we create environment friendly products. Our panels are made of renewable, recyclable and biodegradable material. Cork.

We combine modern, sophisticated design with care for the environment. Naturally.

HOW IS CORKWALL MADE?

Obviously, to make corkWALL panels we use cork. However, we do not extract it specifically for our needs but we use a waste from the production of wine corks. Granulated cork is molded in shape with mass color pigmentation.

WHY CORK?

Cork is one of the most versatile natural raw materials known. Cork is a very lightweight material, elastic and flexible. Cork is also a good thermal, sound and vibration insulator.

In addition, it is a renewable material, suitable for recycling and biodegradable.

For us - perfect.
