DŘEVĚNÉ LIŠTY

dukta[®] - increased wood flexibility

Dukta[®] panel is an ecological product for designing interiors and improving interior acoustics. Dukta[®] panel offer visually pleasing effect and good sound absorption properties simultaneously.

Dukta[®] panels are one-sided or two-sided wood-based panels. Thanks to a special milling process we achieve flexibility of planks. They are especially suited for use on walls and ceilings (straight or curved surfaces), and also in case of standalone partition walls or pieces of furniture. .

Input material for manufacture of MDF panels is natural or black beech plywood or triple-layer spruce panel. In order to develop the possibility to use this material in interior design, we offer now new digital printing plates: dukta[®] PRINT.

Imprinting can be realized on any type of standard milling we offer:

LINAR

JANUS

SONAR

FOLI

Wide range of
applications
Extensive selection of
motives

Design: wood – brown

Dukta® PRINT, JANUS 3-layer spruce panel without PU, with the „wood-brown” motive imprinted
Panel size: External size 2500 x 1020 mm, utilization surface 2300 x 950 mm

Design: wood – grey

Dukta® PRINT, LINAR beech plywood without PU, with the „wood-grey” motive imprinted, panel size:
External size 2500 x 1250 mm, utilization surface 2350 x 1200 mm

Design: corrosion

Dukta® PRINT, SONAR, MDF natural free of PU, with the „corrosion” motive imprinted
Panel size: External size 2500 x 1250 mm, utilization surface 2300 x 1200 mm

Individual print

We can gladly present you some other motives, any according to request. Contact us!

Note: Imprinting of a chosen motive on milled dukta® panels is not identical to the input image and differences in color may appear.

dukta® PRINT, SONAR MDF natur with the „tree” motive imprinted (cut out from a single panel, size approx. 700 x 600 mm) Panel size: External size 2500 x 1250 mm, utilization surface 2300 x 1200 mm

We process only the highest quality wood-based panels.

Perfect for regions acoustically sensitive like recording studios, cinemas, concert halls or training rooms.

Universal applications in interior design and decoration. (carpenters, furniture producers, interior designers)

General information on dukta® PRINT panels

Dukta® PRINT panels are available from 5 boards per a single project. You may select from our standard menu of patterns or use our individual print offer according to your project.

Information on process and delivery terms can be sent on your request.

Sample and promotional materials available on request.

We are able to deliver printed boards in small amounts directly from our warehouse.
