

Handrails

Comfort and safety in Your hands.

Range of wooden handrails covers various profiles of many types of wooden products and custom accessories made of wood and stainless steel (grips, arcs, etc.)

Newly launched product in this range is a handrail with aluminum core, which facilitates its installation and prevents deformations.

Our offer is also aimed at carpenters realizing services.

Range of applications of our wooden handrails is very wide, starting from a family house to large buildings (office buildings, nursing homes, schools, kindergartens, etc.)

If You are looking for something unique, we offer handrails designed specifically for large format facilities. This may include handrails with lighting, handrails for revitalization in old buildings or handrails with bearing area.

Although handrails may be of varying shape, the top surface is always of oval shape. Wooden handrails consist of straight and curved segments. Curved segments are used in turns of stairs.

Thanks to our many years of experience we can offer not only highest quality wooden handrails, but also extensive additional services. For instance, we can comprehensively adjust our offer to Your project.

We invite You to contact our company. Our team will advise, produce and install the wooden handrails best suited for You.
